

March 6, 2026

Dear Valued Customer,

Global polyethylene markets have been significantly disrupted by recent geopolitical events in the Middle East. As a result, the market is quickly rebalancing supply, which has caused the price of polyethylene made in North America to rise sharply and immediately. A significant price increase has been disclosed by our resin suppliers, and it is anticipated to take effect this month.

In response to the March resin increase, Trioworld Ltd will implement an increase of 10% effective with all new orders placed on or after March 23, 2026.

All orders must call for immediate delivery. Trioworld Ltd can only accept a limited number of new orders and reserves the right to accept or decline any order for any reason.

Your Trioworld Ltd Sales Representative will be in contact with you to answer any questions and advise you of the changing market conditions. Thank you for your continued support and loyalty.

Regards,

Bob Arpas
Canadian Sales Director
Trioworld Ltd
