

BioPlus[®] TERRA

A Fully Compostable Package Made From 100% Recycled Paper

Bio-Plus Terra; recycled, re-used, re-processed, returned to Earth

FOLD-PAK A RockTenn company

Bio-Plus® Terra is the most environmentally friendly packaging offered today. It is made from 100% recycled paper using 35% or greater post consumer reclaimed paper. Bio-Plus Terra has a PLA natural inner coating that allows the container to be composted in a professional composting facility. Bio-Plus Terra re-uses our natural resources and then returns back to nature as compost, reducing the amount of packaging that ends up in landfills. Our container can be used for all types of food, hot, cold, wet, or dry, which reduces the amount of packaging you need. Bio-Plus Terra will meet your need to keep fresh foods fresh and hot foods hot. Bio-Plus Terra performs well, is stackable, is leak and grease resistant and is microwaveable.

Reduce, Re-use, Recycle

Bio-Plus® Terra is endorsed by the Green Restaurant Association and each box is printed with the endorsement on the bottom so your customers will know you are environmentally responsible. Bio-Plus Terra can be custom printed in up to three colors, using FDA approved, water based, food grade inks that are safe for the environment.

You will be able to enhance your brand name through custom print to get your message out. Bio-Plus Terra is beautiful, environmentally responsible, affordable packaging that will keep your food fresh, impress your customers, and encourage repeat business.

ORDERING INFORMATION

SIZE	Bio-Plus Terra SKU	CASE PACK	SLEEVE PACK	HEIGHT DIMENSIONS	BOTTOM DIMENSIONS	CASE CUBE	CASE WEIGHT
