

PHARAO BIOGERM

Antiseptic Disinfecting All-Purpose Cleaner

D.I.N.: 02251388

N-ALKYL (5% C12, 60% C14, 30% C16, 5% C18)

dimethyl benzyl ammonium chlorides 0.8%

N-ALKYL (68% C12, 32% C14)

dimethyl ethyl benzyl ammonium chlorides 0.8%

DESCRIPTION

BIOGERM is a concentrated cleaner and disinfectant that is efficient for cleaning and sanitizing. It is safe on floors, walls, woodwork and all washable surfaces and it is effective at wide range of temperatures and water hardness. Recommended for farms, pigsty, stables, henhouses, hospital, schools, public buildings, offices, hotels, factories and washrooms.

ADVANTAGES

1. Kills 99.9% of germs.
2. Cleans and sanitizes in one easy step.
3. Has some emulsifying properties that prevents dirt incrustation.
4. Acts instantaneously, is economical and requires little efforts.
5. It is easy to rinse and it is biodegradable.

OTHER USES - To clean or disinfect poultry equipment (brooders, drinking troughs and feeding equipments) animal quarters and kennels, all animals and their food must be removed from the premises. You must also empty all troughs, racks, food and water appliances. After removing all litter and droppings from floors, walls and other surfaces occupied and crossed by poultry or other animals, thoroughly clean all surfaces prior to disinfection.

After disinfection, ventilate the buildings, coops and all the other closed spaces. Do not let the animals in or use the equipment before the treatment has been absorbed, set and dried. Rinse with potable water all surfaces and all equipment that has contact with food or drinking water appliances.

TECHNICAL DATA

| | |
|--|------------------------|
| pH (as is) | 12.5 -13.5 |
| Density (20°C)..... | 1.08 g/cc |
| Colour..... | Green |
| Fragrance..... | Discrete lemon |
| Characteristic | Corrosive |
| Biodegradability..... | Complete |
| Flash Point | More than 95°C |
| Freezing Stability | Keep out from freezing |
| Degradability determined in accordance with OECD no. 301D. | |

DIRECTIONS

Light cleaning and sanitizing 16mL / liter water

Normal cleaning and sanitizing 25mL / liter water

Heavy duty cleaning and sanitizing 40mL / liter water

Sanitizing food equipment 25mL / liter water

Contact time for disinfection: Allow surface to remain wet for 10 minutes then remove excess liquid. Prepare a fresh solution for each usages.

All surfaces subject to food contact must be rinse with potable water.
