

BETONEX

Acid cleaner for concrete mixer

DESCRIPTION

BETONEX is a product that is effective to remove concrete, cement and other dirt on the concrete mixer, tools, trowels, shovels, rakes, framing. This foamy product reduces emitted and helps to wash all surfaces. It also contains the inhibitor of corrosion to protect metallic pieces. It is efficient to remove rapidly the Portland cement, the cement under the equipment piece, machinery and limes scale.

ADVANTAGES

1. It has exceptional foaming power, which helps to cover uniformly the soiled surfaces.
2. The foam remains stable which helps to increase the contact time on the wet surfaces
3. It contains inhibitor of corrosion very efficient to prevent the rust.

It is efficient to remove rapidly the Portland cement, the cement under the equipment piece, machinery and limes scale.

TECHNICAL DATA

pH (as is).....	1,0
Density (20°C).....	1.15 g/cc
Colour.....	Brown
Fragrance	Acid Odour
Characteristic	Corrosive
Biodegradability	Complete
Freezing Stability.....	Do not freeze

Degradability determined in accordance with OECD no. 301D.

INSTRUCTIONS:

- For EXTREM cleaning: Mix 50% de BETONEX at 50% of water.
- For REGULAR cleaning: Mix 25% de BETONEX at 75% of water
- For FREQUENT cleaning: Mix 12% de BETONEX at 88% of water
